

## ANTIOX ASX-HS

### Description

ANTIOX ASX-HS is a synergistic blend of various antioxidants: phenolic, phosphorous-derivatives and thioester. It has been developed to stabilize natural rubber solvent-based adhesives. The product is a homogeneous powder blend. This enables to achieve an easy dissolution into the solvent.

### Application

This product has been studied to offer a wide protection to polymer solutions for producing packaging tapes, masking tapes, ...

In solvent system, the suggested quantity is 0.3 - 0.5% on dry rubber content. Due to its physical form, the product is soluble in hexane (1%) even at 25°C.

ANTIOX ASX-HS is not recommended in hot-melt systems, where we recommend ANTIOX AHM.

### Storing

Store at room temperature, protected from direct sunlight and humidity.

Use within 24 months from production date (unopened and in the original packaging).

### Technical Specifications

Method of analysis	MU	Standard
1. Total Solids	%	99±1

### Handling

The product is a free-flowing white powder that must be protected from humidity to avoid blocking.

### Packaging

The product is supplied in fibre drums (50 kg).
