

Primer CP-H Dry

(Provisional)

Description

PRIMER CP-H DRY is a chlorinated polyolefin to be used as a primer and adhesion promoter on difficult substrates. It improves the anchorage on polyolefines and other difficult substrates. It is compatible with various polymers, as acrylics, polyesters, PU, ...

It is water resistant.

Chlorine content = 25.0-27.0 %

Use within 12 months from production date (unopened and in the original packaging).

Technical Specifications

Method of analysis	MU	Standard	
 Total Solids Softening Point, Ring &	%	99.5±0.50	
Ball	°C	75 - 80	

Handling

PRIMER CP-H DRY is soluble in aromatic and aliphatic organic solvents.

Packaging

The product is supplied in fibre drum (20 kg).

Storing

Keep in closed containers, protected from dust and direct sunlight.
